| Date | 21 October 2023 |
| Team ID | NM2023TMID00744 |
| Project Name | Project - The Future Of Work: Data Analysis Of Glassdoor Jobs |

Solution Architecture:

A solution architecture is a structured plan that outlines the design and components of a system or application, detailing how it meets specific business needs.

- * Creating a future-of-work solution architecture involves collecting, analyzing, and reporting Glassdoor job data.
- * It must adapt to changing job markets, emphasize data security, and integrate with HR systems to help organizations make informed workforce decisions.
- * At its core, this architecture harnesses data-driven insights from job trends and employee preferences to drive strategic talent management and organizational growth.

Example - Solution Architecture Diagram:
